

# **IP66 LED 1000W**

## **Profile Moving Head Light**

Item Number: LLIP1000PRO

## **USER MANUAL**

This user manual includes important information for installation and operation. Please read this user manual carefully to install, operate, and maintain the lighting safely and correctly. A verified technician should do the installation and operation.

Please carefully check for any damages caused by transportation.

Before delivery, this device has passed strict quality control and inspection. Please follow the user manual for proper operation. If this fixture is damaged due to operation error or disregard of this manual, the fixture will be out of warranty, and the manufacturer or dealer will not be held responsible.

### **Installation:**

Maximum ambient temperature for operation is between 25°F and 104°F. Do not use under or above this range. Allow fixture to acclimate to room temperature before turning on or transporting. Turn off the power and allow 15 minutes for the unit to cool down before handling. Do not open the unit within five minutes after switching off.

Keep the fixture at least 1.5ft. away from any combustible material, as it is not suitable for direct installation on these surfaces. The unit must be installed in a location with adequate ventilation, at least 20 inches from adjacent surfaces. Ensure that no ventilation slots are blocked. Do not operate in dusty environments.

We advise that an electrician confirms the safety of the electrical data prior to installation. Power off the fixture before installation or maintenance. Before operating, ensure that the voltage and frequency of power supply match the power requirements of the unit.

**Rigging:**

Carefully hold the fixture upside down by its base, unfold the two integrated clamps at the bottom, and rotate one of the clamps to the desired direction. Hang the clamps onto the truss and tighten the screw.

Insert the quick-lock fasteners of the first holder into the respective holes on the bottom of the device. Tighten the quick-lock fasteners fully clockwise.

Pull the safety rope through the holes on the bottom of the base and fasten it on the truss or other fixing point. Ensure that the fixture is secure and will not drop due to clamp damage.

The truss used for hanging this fixture must be able to hold 10 times the weight of this fixture without deformation one hour after installation. Always use a safety cable that can hold 12 times the weight of the unit. Do not stand directly under the fixture while installing, uninstalling or adjusting the fixture.

**Product Specifications:****Electrical Parameters:**

IP Grade: IP66

AC 100 - 240V 50 / 60 Hz

Input Power: 1150W

Rated electrical current: 5.75 A, PF $\geq$ 0.98

**Light Source Parameters:**

Light source: 1000W LED white source module.

LED module expected lifespan: 20000Hrs.

**Optics Parameters:**

Lens: High-definition lens with anti-reflective film.

Zoom range: 6°~52°

## Effect Configuration:

2 prisms, one is 4-facet linear and one is 6-facet circle, can be independent and overlapping combined, can be bidirectional rotating, can be auto-focus.

Two atomized frosts with high-bright output.

0-100% linear dimmer, 4 dimming curve options, 4 dimming speed options.

Electric strobe 1-25Hz, multiple strobe effects.

Fast electric Iris, 5-100% linear adjustment, multi-effects changing with macro function.

## Fixture Movement:

PAN: 540°, 16bit.

TILT: 270°, 16 bit.

## Electronic Control:

Channel: 32Ch/35Ch/60Ch.

Control Protocols: DMX512, RDM, Art-Net, sACN, wireless function (optional).

Control Portals: XLR-3+ XLR-5; RJ45 (optional).

Menu display: 2.4" LCD screen; menu available to be displayed 180° reversely.

Built-in self-rechargeable battery, menu can be edited without power supply (optional version); Support connecting with power bank to enter the menu and edit address code and other settings.

Electronic sensors testing, fan intelligent detect and controllable. Eco mode (sleep mode when standby)

Non-touching magnetic encoder positionable system for pan/tilt.

## Framing System:

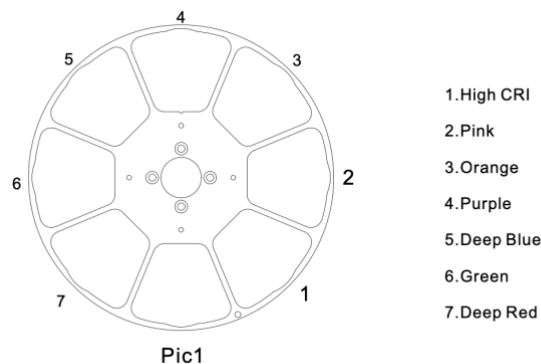

4 x framing blades with precise positioning and no graphics distortion. The framed graph can rotate 360°.

## Color System:

CMY infinite color mixing, high saturated color (RGB) output, pure colors.

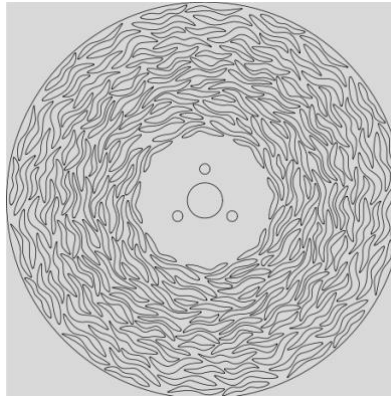

CTO color temperature, 3200K – 6200K linear adjustment.

One static color wheel, 7 color filters plus open, color wheel can rotate in both direction, effects of rainbow, stepping, gradual changing colors.

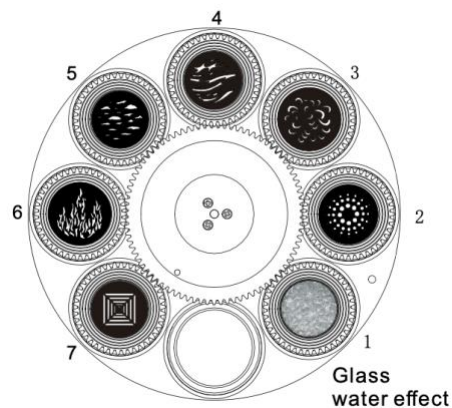

## Gobo System:

Gobo animation wheel, cloud, fire, water flow.

1 rotating gobo wheel with 7 unique gobos + 1 open circle, can bi-directional rotate with effects of self-rotation, running water and shaking, the gobos can be accurately controlled at 16bit.

## Gobo Specifications:

The gobo plates are made from material, it can be customized according to user needs. The size for customized gobo plates:

Material	Outer diameter	Effective Diameter	Thickness
Metal Gobo	Ø22.8mm	Ø 18mm	0.5mm
Glass Gobo	Ø22.5mm	Ø 20mm	3.5mm
Gobo plates adopt high temperature glass(or high temperature metal)			

## Fixture Size and Weight:

Fixture size: 17.48 x 14.17 x 30.08 in

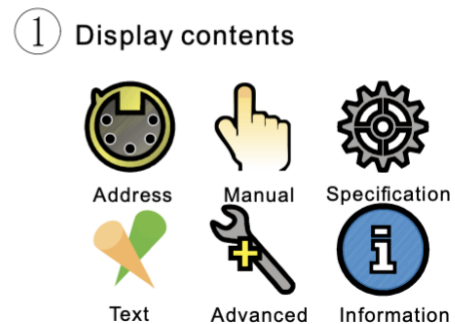

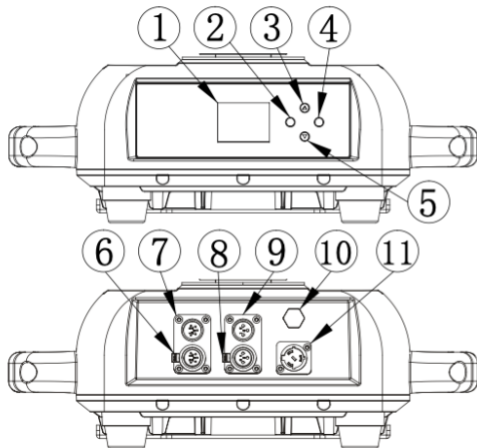

Flight Case: 36.02 x 20.87 x 24.80 in

Net Weight: 105.82 lbs.

Flight Case net weight 57.32 lbs.

IP Rate: IP66

## Operational Panel Instruction:

1.LCD display

2.Menu(Return)

3.Up

4.Enter 8.3-XLR DMX

Output

5.Down 9.3-XLR DMX Input

6.5-XLR DMX Output 7.5-

XLR DMX Input

7.5-XLR DMX Input

8.3-XLR DMX Output

9.Air valve 11.Power

## Panel Instructions:

Up Direction key: Select Sub-menu cyclically(upward).Circulate downward to adjust data value.

Down Direction key: Select Sub-menu cyclically (downward). Circulate downward to adjust data value.

Left Direction key (Back): Back to menu.

Right Direction key (Confirm): Confirm the selected data value o rselect cyclical data window.

## Detailed Operation Table of Display panel

Specification	1.Pan Inverse	Off,On	
	2.Tilt Inverse	Off,On	
	3.PT Encoder	Off,On

## Signal Connection:

The fixture adopts 3pin/5pin socket to control DMX input and output, Pin1 is connected to grounded, Pin2 is connected to "- ", Pin3 is connected to "+ "

Please adopt professional DMX512 STP signal cable, usually its effective range is within 150m. When long distance signal transmission is required, please add DMX 512 signal amplifier.

To avoid the signal reflection during the transmission, please add a terminal which is  $120\Omega$  1/4W resistance between DMX output pin2 and pin 3 of the last fixture. Plug the pin to the DMX output connector of the last fixture.

Connect the fixture from the DMX output of controller to DMX input of the first fixture, and then connect the first fixture's DMX output to the second fixture's DMX input and so on, until all fixtures are being connected. Then please install a terminal plug in DMX output of the last fixture. (Pic 8) The method of connection as show bellow.

## Notice:

Don't use multi- output connector for connecting separately, It must connect the branch with DMX512 signal amplifier to separate them if it is required.

Standard amplifier cable is not reliable for long-distance data transmission; Please adopt professional DMX 512 STP signal cable.

The signal of the fixture only has one input and one output. Two input/output for each fixture are not available.

**Power Connection:**

Input voltage and frequency must be identical to the voltage and frequency marked on the fixture. When many fixtures are working at the same time, it is strongly recommended to control each fixture on/off individually.

L(Live line)Brown wire

N(Null line)Blue wire

E(Earth line)Yellow and green wire

**Installation Instruction and Requirement:**

The user need to arrange regular safety inspection for the fixtures and parts that are connected to the fixture. Please have professionals to operate if operating conditions and professional instructions are insufficient. Incorrect installation by non-professionals may leading to property loss or life danger.

Make sure there is no damage to rigging and clamps and they can bear at least 10 times weight of the fixture. Check if the truss or pipe construction can bear at least 10 times total weight of all equipment, like clamps, cables and other accessories.

**G-Clamp Installation:**

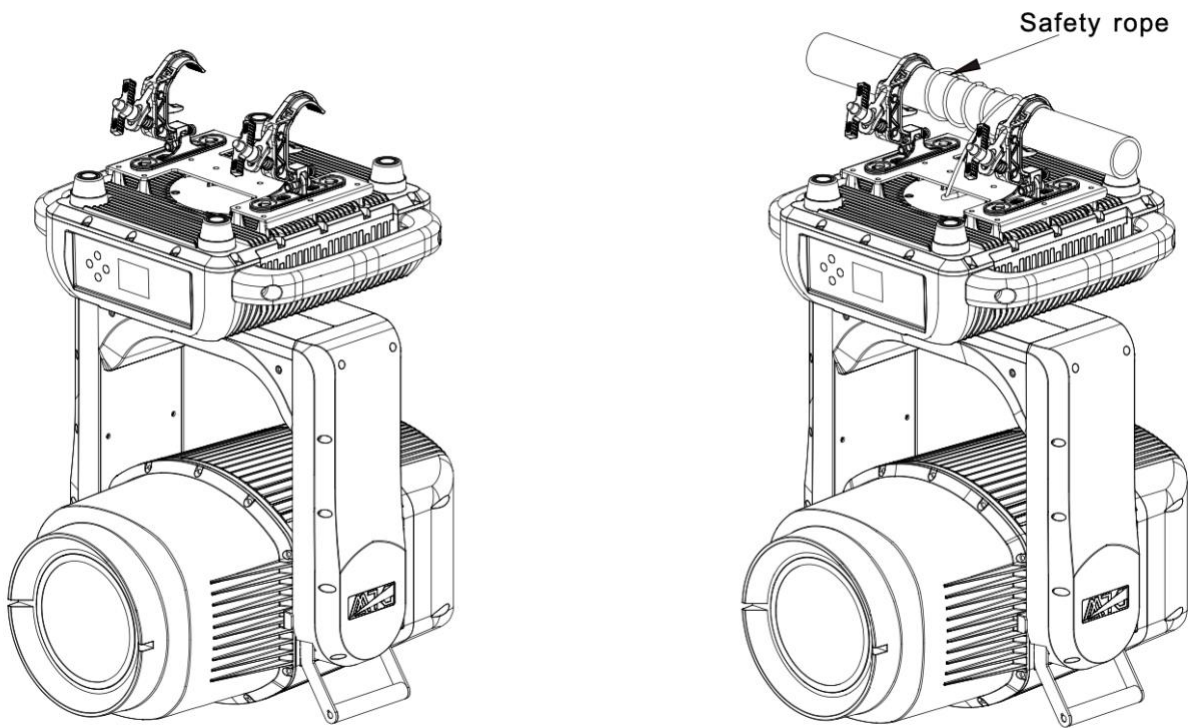

Install the G-clamp onto the base of the fixture, plug the G-clamp into the installation hole of the fixture's base. Rotate the quick lock plate into the slot tightly. Use the same installation method for the second G-clamp

**Fixture Installation:**

Fixture is installed on the stage or truss, and the G-clamp can be locked on the truss tightly and quickly.

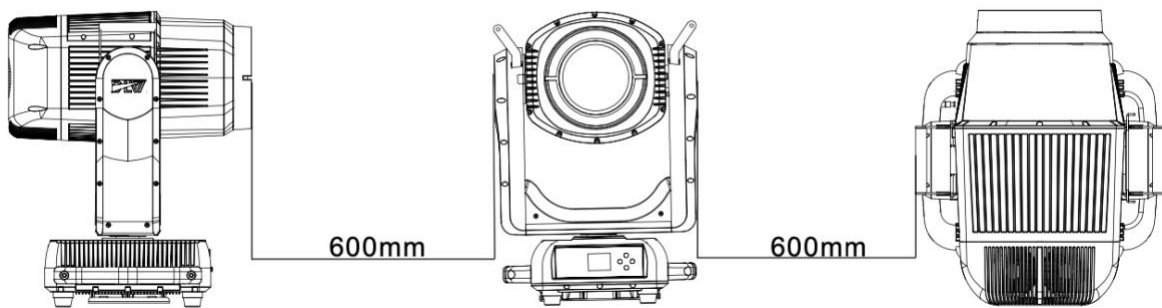

**Notice:**

User must check if the G-clamp and safety chain are damaged or not.  
When hanging a fixture, the safety rope must pass through the handle.  
Please unlock the lock of pan/tilt before power on.

### Fixture Placement:

When place the fixture, please check there is no inflammable object or inflammable material around the fixture. Then place the fixture vertically upward. The shortest safety distance for adjacent fixtures is  $\geq 0.6$  m when they are working. Fixtures installation show as follow
